Re: Written *Ex Parte* Communication; WT Docket Nos. 06-150, 06-169, and 96-86;  
PS Docket No. 06-229

Dear Chairman Martin:

I have worked as a Police Officer for over 20 years. I have made a commitment to making my community safer for everyone. I believe that to do so requires my department to do what ever it takes to get the job done. It is critical that my team and other agencies are able to communicate with each other efficiently. That is why it important that the FCC designate at least 10 MHz of commercial spectrum for public use through a private partnership.

In order to develop this communication network, funding and a larger spectrum are essential. The plan proposed by Frontline Wireless provides both of these components. They plan use private capital to build out the network, which will allow the doubling of spectrum available to first responders.

This build out will serve 99% of the United States, and allow local agencies to maintain control of the system. Simply put the Frontline Wireless plan will be use to save lives in the future. I hope you will give this proposal strong consideration and look favorably on making the needed commercial spectrum available.

Sincerely,

  
Fred Bodzioch
